Yard Waste Disposal

Improper disposal of yard waste, such as dry leaves and grass clippings, poses an environmental threat. These contents often end up in landfills, producing harmful methane gas as they decompose.

The City of Chicago have proposed many solutions to separate yard waste from landfills that yielded minimal success.

Yard Bot is a software developed to utilize social media to streamline the yard waste pickup process. Allowing current Facebook users to quickly request yard waste pickup on the Messenger platform.

What are considered Yard Wastes?

Yard Waste Include

- Dry Leaves
- Grass Clippings

DO NOT include

- Trash
- Food

Disposal Methods

- Request pickup at fb.me/YardBot
- Composting leaves into mulch
